Dear Mr. Christian:

This letter serves as acknowledgement that the Idaho Department of Lands (IDL) received the above referenced spacing application on May 23, 2025. As described in Idaho Code § 47-328 (3)(a), "The department shall notify the applicant within five (5) business days of receipt of an application if additional information is required for the department to evaluate the application." After reviewing the spacing application, IDL requests the following additional items to clarify certain parts of the application as submitted.

1. The Notice of Service list for the subject Docket, including addresses of noticed parties, and copies of the certified mail receipts as required by Idaho Code §47-328(3)(b).
2. The applicant should be prepared to present and discuss the following information as it relates to the requested spacing unit at the evidentiary hearing:
  - a. Structure maps in subsea depth, and isopach maps in feet for the A and B sands. Two-way seismic travel time and isochron maps are not sufficient and will not be accepted.
  - b. Results of any and all pressure testing performed on the perforated zone in the A and B sands in the Fallon #1-10 (USWN 11-075-20032) and Barlow #2-14 (USWN 11-075-20034) wells, including but not limited to: multi-point testing, build-up tests, bottom hole pressure tests and Repeat Formation (RFT) tests.
  - c. Porosity and permeability of net pay in the A & B sands in the Fallon #1-10 (USWN 11-075-20032) and Barlow #2-14 (USWN 11-075-20034) wells.

- d. Thickness of net pay in the A and B sands.
- e. Water Saturation of net pay in the A and B sands in the Fallon #1-10 (USWN 11-075-20032) and Barlow #2-14 (USWN 11-075-20034) wells.
- f. Reservoir temperature in the A and B sands in the Fallon #1-10 (USWN 11-075-20032) and Barlow #2-14 (USWN 11-075-20034) wells.
- g. Gas analysis and Gas-oil ratio in the A and B sands in the Fallon #1-10 (USWN 11-075-20032) and Barlow #2-14 (USWN 11-075-20034) wells.
- h. Gas Formation Volume Factor in the A and B sands in the Fallon #1-10 (USWN 11-075-20032) and Barlow #2-14 (USWN 11-075-20034) wells.
- i. Estimated original gas in place and expected recovery.
- j. Reservoir Drive Mechanism.

IDL has not made a determination regarding the completeness of the application as it pertains to the necessary information as provided in statute. The above request for information is only to clarify certain aspects of the information submitted in the application.

Good Morning,

I am an “uncommitted mineral interest owner” in the above-referenced matter. I do not have enough information to make an informed decision about whether to object to the proposed spacing unit. I am concerned over the potential risks of drilling near my home and through my drinking water aquifer. Consequently, considering today’s deadline for a response, I must object to being included in this spacing unit. Thank you for your consideration.
