Subject: March 9th, 2021 hearing regarding Docket No. CC - 2016 -OGR - 01 - 001, proposed Barlow # 2 - 14 well.

Dear Sir;

I am a resident of Fruitland and I am opposed to the drilling of a second well in the vicinity of the existing Barlow well. My opposition is based on the following points:

1. I believe that the forced pooling integration process violates personal property rights and will be found to be illegal by future court rulings.
2. In the city of Fruitland and in Payette County in general there is a heightened awareness of issues and risks associated with oil and gas wells and I believe if the integration process was repeated today significantly fewer property owners would choose to lease their mineral rights compared to the number that did in the original integration.
3. The drilling of additional wells near the Payette river and the city of Fruitland water supply poses significant environmental risks to the river and potential health risks to the city water supply.

Thank you for considering my objections to the drilling of a second Barlow well.

Sincerely,

Charles Otte
