---

Due to the unforeseen occurrence that we are experiencing with COVID-19, we would have wanted more time to write our responses and gather our thoughts. We are living one day at a time and its difficult to focus on the future long term right now. I do want to express our concerns in regards to the gas/oil well that the Alta Mesa companies want to drill.

Their plan would affect us in the following ways:

- Our health is put at risk due to water contamination
- Property values will drop dramatically
- A beautiful neighborhood will no longer exist

We are completely opposed to what Alta Mesa wants to do near our home. Despite who owns the wells and who receives payments or royalties, ***all property owners will share the negative impacts***, our water supplies would be contaminated and our health would be put at risk. Please let us know what we can do to protect our families and our property rights. Thank you for allowing us to submit our response.
