Hi Ms. Romine,

Could you please replace the letter I sent yesterday via email with this one as an attachment. I had thought I was sending it to someone else and had written a personal line on it. I would greatly appreciate your effort.

Barlow Well Impact

Pleased be advised that as a homeowner in the Fallon section of Fruitland I am dismayed to once again hear that SROG's intent is to drop a second well next to the Payette River. I am extremely opposed to the drilling of the Barlow 2-4 well. If SROG insists on going ahead with their plans, they must meet the requirement of a new integration application. We as homeowners should be protected against risking our homes, our lifestyles and the good quality of our water for an oil and gas company's profit.
