---

Hello Kourtney,

Can you please add the comments below to the written record to voice our opposition to CC-2020-OGR-01-002?

Thank you,

Brenda and Joey Ishida

Fruitland Resident

Idaho Department of Lands,

We are opposed to allowing yet another well site to be opened up by Snake River Oil and Gas. They keep talking about how they want to integrate unleased mineral owners in the proposed unit. There has not even been a decision on the terms of "just and reasonable" on the last integrated unit. We believe that a new spacing application should not even be allowed on the docket at this time.

Additionally, this proposed unit is in a flood plane near the Payette River which causes me great concern for the city of Fruitland and their drinking water. We homeowners and taxpayers are opposed to this application, and would like our voices to be heard.

Thank you,

Brenda and Joey Ishida

(Fruitland)
