Subject: RE CC-2020-OGR-01-003 hearing
Date: Sunday, March 07, 2021 10:01:51 AM

Kourtney Romaine et al.

As residents of Fruitland, ID we must once again voice our opposition to the plans by Snake River Oil & Gas, this time for a SECOND well on the Barlow property near the Payette river. It is our understanding that the law permits only one well per spacing unit. Now they want to add a second well and without a new integration application. If SROG insists on proceeding then they should be required to make a new application instead of using the old one from 2016.

We are not against oil and gas drilling but not at the significant risk of environmental damage to our community and to a water source that serves many thousands of people and farms along the Payette. Both the citizens of Idaho and the state, have already experienced the bogus "financial" rewards promised by the previous drilling companies, (Alta Mesa and High Mesa). And now this fraud has simply reincarnated as Snake River Oil & Gas.
