Subject: Spacing application concerns and objections
Date: Thursday, June 04, 2020 10:43:13 AM

IDL ,

Please have the record show that we as Fruitland residents, land owners, and business owners are opposed to the current spacing application filed on 2/24/2020 by Snake River Oil and Gas. We are extremely concerned about gas exploration and extraction in our community—especially in such close proximity to the Payette River and the city of Fruitland’s water supply. We are additionally very concerned about dealings with companies that have changed names and leadership multiple times, filed for bankruptcies, and have pending lawsuits against them. We have expressed our objections to this many , many times, and we are very frustrated that we have to continue to do so every time the spacing is re-drawn or a company is renamed. It is hard for us not to become dubious of this process . Please don’t let us down. Hold our resources to very high, consistent standards , and please vote no on this application , and anything that raises doubts or puts Payette County residents , natural resources ,and property at risk.

Thank you,
Dana, Jordan, Teddy, Rainey , and Boone Gross
