Re: Idaho Dpt. of Lands Hearing, Oil and Gas Spacing Order

Dear Sir:

My name is Joyce McCurdy and I reside at 2742 Birch Rd. Fruitland, Idaho 83619.

I do live in the Fallon section and any and all decisions regarding the Barlow well do impact me and my property.

I am strongly opposed to the approval of this new application.

\* Speaking for myself and not any organization, I strongly oppose the drilling of the Barlow 2-14 well and support the requirement of a new integration application if the operator insists on moving forward with this.

\*I have built a home in the Northview Ranch subdivision in Fruitland Idaho and was relatively certain this would be a peaceful and safe area to reside.

\*I want my property values to be free from jeopardy!

\*I want the water supplies to be free of contamination!

\*I want my health and those in this area to be free from health risks!

\*I want the Payette River and the air quality to be environmentally safe!

\*I do not want the beautiful landscape of this area to be altered!

**\*As industry representatives have stressed in the past, the law promises one well per spacing unit, not multiple wells – and now SROG wants at least two . . . next to the Payette River.**

**\*I request that you protect private property rights for all of us! Please do not cater to this industry that is attempting once again to threaten our property rights!**

I respectfully appreciate your dutiful handling of this matter. Please do your job by protecting the rights of the citizens of Idaho.

Sincerely,

Joyce McCurdy
