BOISE, IDAHO

Mick Thomas,

My name is Jessica Hayes and I live in the Northview Ranch Subdivision in Fruitland, ID. I am writing in regards to the packet we received from the IDL concerning Alta Mesa's application for a gas/oil well. I am against the drilling and force pooling and want to have my voice heard in this matter. The health of my family and our water supply being free of contamination is a serious concern. The well that has already been drilled is only 100 yards south of the Payette River, and only 1,000 feet from the Fruitland Water Plant. Other concerns I have are in regards to the air quality and environmental safety issues that this drilling and force pooling will inevitably bring about. My final concern is that I want my property values to be free from jeopardy. Property values typically drop 2-13% in areas where drilling is occurring. We need our private property rights protected, and our families. This must be stopped. Thank you for your time and consideration.

Jessica Hayes
