RE: Document No. CC-2020-ORG-01-002

I am **against** subject spacing request by Snake River Oil & Gas. I have the following questions and requests.

What is the purpose of taking a quarter from four existing sections to create this “unit”?

Is this sizing change for the benefit of the mineral owners or for increased capital gain for Snake River Oil & Gas?

Will the mineral leases and royalty payments in existing sections be honored?

Last but not least how will the drilling activities of said “unit” affect our land, waters, air quality, health, safety as well as our property values.

O&G regulations are to protect the property and/or mineral owners and citizens as well as our land, water and total environment? Please ensure that they are enforced and revised as necessary.

Do the right thing for the people of Idaho and deny this spacing application.
