Kourtney Romaine,

My home is included in an area where Alta Mesa has applied for a permit to drill for a gas/oil well.

The Fallon well is already in place. It is only 1.000 yards from the Payette river and 1,000 feet from our water source, the Fruitland water plant.

Our neighborhood, Northview Ranch, is one of the largest Homeowner Associations in Fruitland. It will be negatively impacted if Alta Mesa is given access to the 610 acres it has applied for.

If they are given permission to our this area, our property values will surely be reduced. I don't want our water contaminated or risk our health. The Payette river and our air quality are already at risk.

Please protect our neighborhood and our individual private property rights.

Do not approve Alta Mesa's application or allow them access any other neighborhood in Fruitland.

Thank you in advance for rejecting their application.
