Idaho Department of Lands
Attention: Mick Thomas

Dear Mr. Thomas,

I ask that you deny this application (Docket No. CC-2020-OGR-01-001). I don't live in the affected area, but I have friends who do.

They're very concerned about the impact oil and gas operations will have on their property values, their health and safety, and their water supply.

The last oil and gas company that operated in the region went bankrupt. Oil and gas prices are currently very low, and now that we're in a recession, prices will probably stay low for a while. Will Snake River Oil & Gas operate in a safe and responsible manner or will it take short cuts to increase profitability? Will they go bankrupt too and leave a mess behind?

This application shouldn't be approved, there are too unknowns that pose unacceptable risks to the residents in the area.

Thank you for your consideration of my comment.

Sincerely,

Elizabeth Roberts
