Dear Ms. Romine,

On September 12, 2018, my husband and I moved into a beautiful subdivision near highway 95 in Fruitland, Idaho. We have enjoyed living in our quiet and clean neighborhood since then. Unfortunately, we are in the targeted 610 acres from the gas/oil well that the Alta Mesa companies want to drill. This would affect us in many ways.

We are completely opposed to what Alta Mesa wants to do near our home. Our property values will be at great risk of dropping, our water supplies would be contaminated and our health would be put at risk. Please let us know what we can do to protect our families and our property rights. Thank you for your time in reading our cry for help in this regard.

Javier and Leticia Arciga
