To Whom It May Concern,

I am the home owner at 1420 Cottonwood Drive in Fruitland, Idaho. Recently, I have been made aware Alta Mesa Idaho has applied for a gas/oil well close to my home. As a property owner in the targeted area, I have not received official notice. I am opposed to well being drilled in this location. I do not want our water supply or property values placed in jeopardy and am concerned about the greater environmental impact. The Payette River is a major tributary of the Snake River which is the largest tributary the Columbia River. Why would these water sources be placed in jeopardy for the private gain of an oil/gas well?
