13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones, attach the Bond under which the work will be performed or provide the Bond No. on file with IDL. Required subsequent reports shall be filed within 30 days following completion of the involved operations. Final Abandonment Notices shall be filed only after operations. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Alta Mesa plans to perforate and flow test 2 separate Sands in the subject well. We will perforate and flowback each zone individually in order to determine productivity of the various sands. AMS will begin perforating and flow testing on February 21, 2014 with a target completion date of February 25, 2014. IDEQ has given approval that AMS will be exempt from a required permit from their agency due to the small amount of flaring that will take place.

14. I hereby certify that the foregoing is true and correct
