All wells with "pending" status are currently closed to the atmosphere by the pressurized well head and a valve that is closed off. Additionally, the well has a steel cage around the entire well head in order to prevent unauthorized entry, and jersey barriers around the outside to assist in preventing possible vehicular damage.

AMS appreciates the conscientious service that Idaho Department of Lands has provided to AMS this past year. Should you have any further questions, please feel free to contact me at 360-960-5671.
