

RE: Kauffman contact in early June, 2018

Date: 9/10/18

To ensure appropriate disclosure of any contacts involving the pending Kauffman filed Complaint to the Oil & Gas Commission last December, I am disclosing a telephone contact with Randy Kauffman that occurred on about June 14, 2018. Randy called and expressed displeasure in the lack of progress in obtaining requested information concerning production and sale information of his share of royalty interest involving their interest in two productive wells. There were ongoing delays involving the hearing officer and Alta Mesa personnel in supplying technical information. Since the results of the latest hearing had not been posted on the Commission website yet, I asked how the recent hearing went. He responded that another hearing was planned for further discussions. I offered no advice and have not had any further contact with the Kauffman's on this matter since that time.
