RE: Application and Notice of Intention to Abandon – Espino #1-2 (USWN 11-075-20004), White #1-10 (USWN 11-075-20013), Korn #1-22 (USWN 11-075-20014), Tracy Trust #3-2 (USWN 11-075-20011) and State #1-17 (USWN 11-075-20005)

Dear Mr. Jameson:

The Idaho Department of Lands has received AM Idaho, LLC's Application and Notice of Intention to Abandon Well for the following five wells: Espino #1-2 (USWN 11-075-20004), White #1-10 (USWN 11-075-20013), Korn #1-22 (USWN 11-075-20014), Tracy Trust #3-2 (USWN 11-075-20011) and State #1-17 (USWN 11-075-20005). The permits to plug the above named wells are approved under the following conditions and will expire one (1) year from the date of this letter:

1. Plugging operations must follow the procedures outlined in the Notices of Intention to Abandon that were submitted to the Department September 27, 2018. Changes to the procedures must be provided to the Department by Sundry Notice and in accordance to IDAPA 20.07.02.502.
2. A completed copy of the Plugging Record shall be filed with the Department no more than thirty (30) days after completion of plugging operations in accordance with IDAPA 20.07.02.502.06. A copy of this form is attached and can be downloaded from the Department of Lands website.

If you have any questions, please don't hesitate to contact me at your earliest convenience.

Sincerely,

James Thum

RE: Notice of Intention to Abandon Well--Revised
White #1-10, API #11-075-20013 in Hamilton Field, Payette County

Dear Mr. Thum,

This letter is to inform you of Alta Mesa Services, LP intent to permanently plug and abandon the **White #1-10** well located in Section **10**, Township **7N**, Range **4W**. Preliminary review determines that this well might not be cost effective for us to build the required infrastructure in order to produce it. Attached is the Wellbore Diagram from November 2010 for your reference.

Following is the procedure that we plan to use for the proposed work:

1. This well is natural gas and allows us to pump cement plug from the surface down 2-7/8" tubing and inject into open perforations. Move in cement pump truck and spot 100' cement plug across perforations at 1,880'-1909'.
2. Move in electric wireline unit and perforate existing 2-7/8" tubing 1,826'-828' MD.
3. Circulate 500' balanced cement plug in 2-7/8" and 5-1/2" from 1,328' to 1,828' MD.
4. Cut 2-7/8" @ 300' MD. POOH with 300' of 2-7/8".
5. Set 5-1/2" CIBP @ 300' MD.
6. Perforate 5-1/2" @ 290' - 292' MD.
7. Circulate cement down 5-1/2" and up 9-5/8" surface casing filing to surface.
8. Cut off wellhead and cap same with metal plate per IDL regulations. Cut off all pipe at 6' below ground level. Weld steel plate on top of pipe. Mark location with at least 4" diameter pipe at least 10' in length, leaving 4' above the ground level. This pipe is to be welded to the surface casing or embedded in cement.
9. Restore location per IDL and landowner requirement.
10. File final abandonment records with state.

We intend to begin this work as soon as possible, in order to use resources efficiently in completing work on other wells as explained in previous Sundry Notices. Thank you for your consideration of this request. If you should have any further questions, please feel free to contact me at **281-944-0638**.

Sincerely,

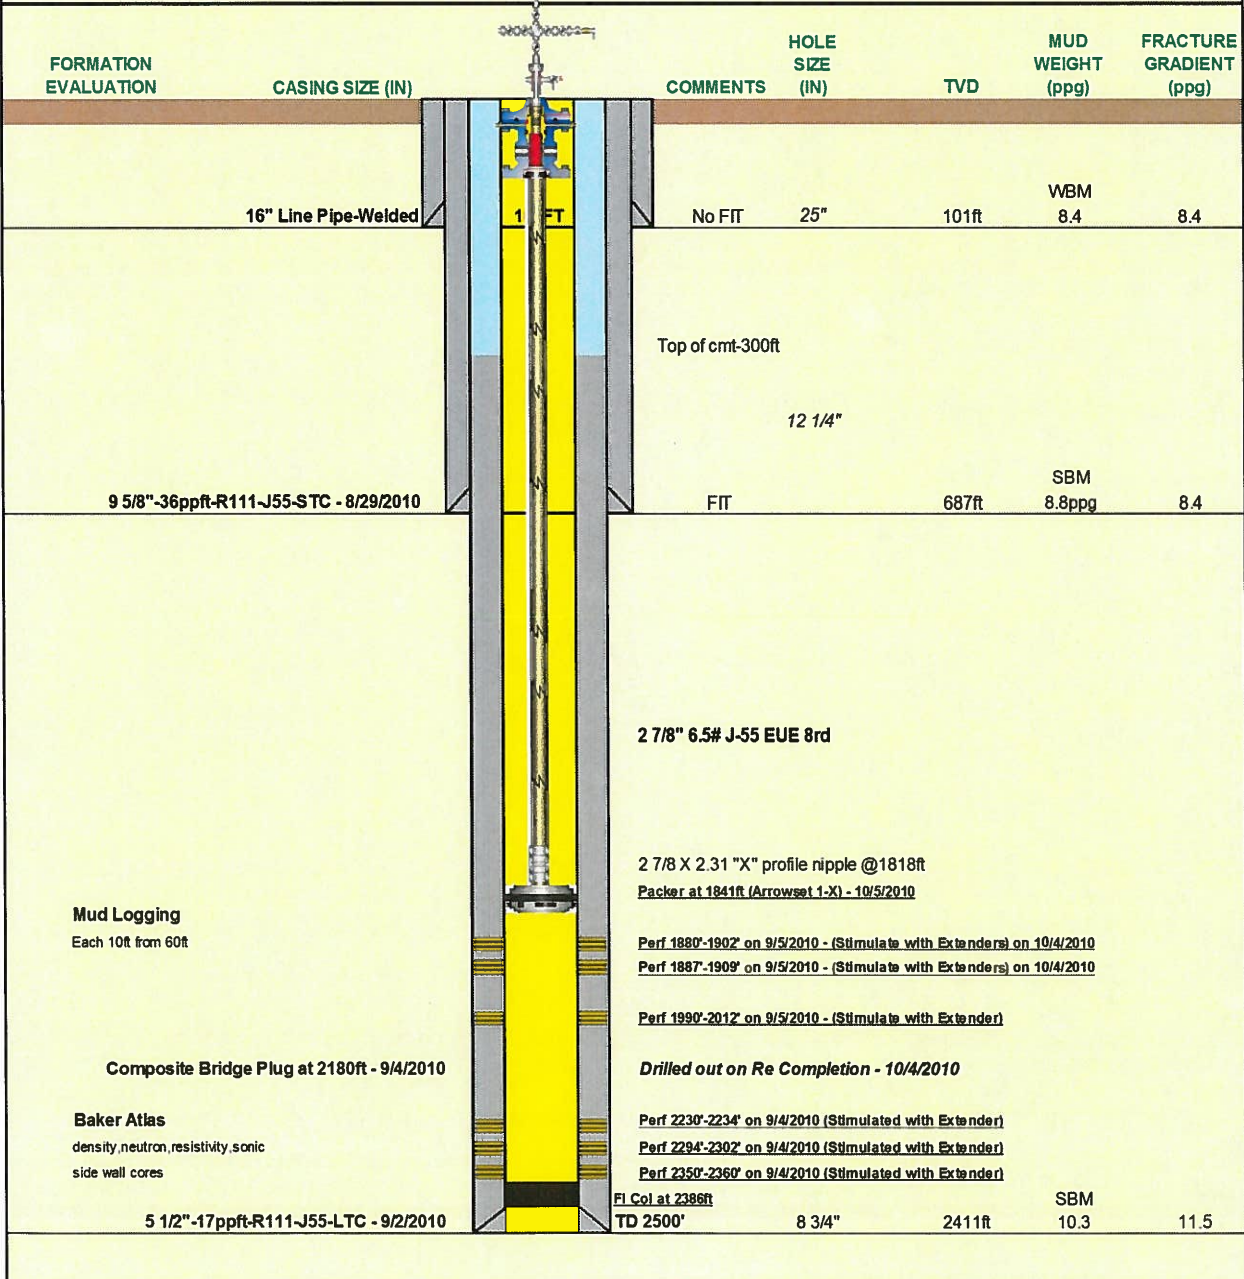

Max Jameson
Regulatory Coordinator
