Comment:

To whom it may concern,

I understand an application has been made to start another well near one already drilled upstream from the the intake for the Fruitland public water system. This poses a pollution danger to the Fruitland water supply, is not safe, and should not be permitted.

Please Reply to my complaint with justification if the well is permitted contrary to public safety and your rationale despite evident safety concerns given the proposed wells proximity to Fruitland's public water intake.

I look forward to hearing that you have not permitted the well on clear grounds of public safety.

Take Care, Be well – Be safe, healthful, sane, and Well; do good safe work and rest; and I look forward to hearing of your denial of the applicants application to permit the proposed well.

Thomas Rogers (208) 949-7807 (cell)
