Re: Application of Snake River Oil and Gas, LLC for permit to drill gas/oil well identified as Barlow #2-14.

Dear Mr. Thomas:

I have been informed that Snake River Oil and Gas, LLC has applied for a permit to drill a gas/oil well identified as Barlow #2-14. I strongly oppose this application. Barlow #2-14 is slated to be drilled on the banks and in the floodplain of the Payette River. I was incredulous when I heard that. Barlow #2-14 will be situated only 20 feet from Barlow #1-14 which was drilled by Alta Mesa in 2018. The possibility of danger to the Fruitland city water supply is real since both wells are just upstream from the city's water intake plant. That should be a critical consideration in determining this application. In addition, a water disaster would be a threat to the homes, farms, wildlife and livestock living in or near the river. Please do not approve this application.

Sincerely,

Nancy Wood
