Section 10: Inspection Comments Comments and Issues of Concern: Surface casing: 300 PSI Production casing: 0 PSI (10 PSI 11/1 6 month pressure report) Production tubing: 170 PSI (183 PSI 11/1 6 month pressure report) Section 4 Commentary Vectorian (5%)
Section 4 Comments: Vegetation <5% on well pad except within and around the wellhead protective fencing where it is closer to 25%. This includes rooted vegetation and trapped tumbleweeds. No weed abatement measures are apparent within this fencing. Old completion rig that was located in the SE corner of the pad has been removed. An unutilized/decommissioned gas separator and flare stack are located in the SW corner of the well pad. Cellar has been filled with gravel.
Section 11: Attachments List any and all attachments including photos, samples, documents, etc: Photos taken with phone: file numbers 20211129-110917 through 20211129-112039 (12 photos).
