BOISE, IDAHO

Re: Land/Property Rights Grab

We moved to Idaho believing that special interest would not be interfering with our rights unless we were duly compensated. That does not mean a tiny check (not cashed by the way) and going to court to take away my rights as a property owner.

All I can think about this, is the areas that have sink holes in the midwest and other areas where drilling is done to the severe detriment of ~~our~~ our communities. We need clean water, air and safety from companies who would harm us to make a buck.

Sincerely,

Rebecca Ferrara
