RE: Gas and Oil Lease

Dear Mr. Mick Thomas.

The purpose of this letter is to advise your office that we did not sign any lease nor did not receive notice or have any knowledge prior to our meeting with Julie Fugate.

We strongly object based on that our property values could drop 2-13 percent when drilling occurs and can contaminated up to 75% of our water supply. WE want a water supply free of contaminates, our family free from health risks associated with drilling and to keep the Payette River and air quality environmentally safe. Further we expect your office to protect our private property right.

Sincerely

Richard L Addison and Cheryl L Addison
