13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones, attach the Bond under which the work will be performed or provide the Bond No. on file with IDL. Required subsequent reports shall be filed within 30 days following completion of the involved operations. Final Abandonment Notices shall be filed only after operations. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

AMS intends to resume flow testing the Kauffman 1-9 LT well in order to determine the viability for production. In order to achieve this, AMS will place the well into operating status and produce the well utilizing the flow line from the well to the Little Willow facility, where any received natural gas will be flared. The test will be conducted for a projected 18 days in order to determine the viability of the well. Any oil (if received) will be trucked off the location and any water received will be trucked to an approved disposal site. All volumes of product received will be monitored continuously throughout the flow testing process.

RE: Sundry Notice – Kauffman #1-9 LT

Paul,

Per your discussion with John Peiserich last week, I am enclosing a Sundry Notice for our Kauffman #1-9 LT well, API #11-075-20027 to resume the flow testing. This testing is projected to be conducted for 18 days.

If you have any questions, please feel free to give me a call at 361-960-5671.

Regards,

Ronda Louderman
Regulatory Coordinator
