13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones, attach the Bond under which the work will be performed or provide the Bond No. on file with IDL. Required subsequent reports shall be filed within 30 days following completion of the involved operations. Final Abandonment Notices shall be filed only after operations. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Procedure: On January 19th, 2016, Alta Mesa Services, LP ran a cement bond log on the subject well. The bond log indicated that we had good cement bond across the productive interval in this well. The log also showed an estimated top of cement at 1900'. We rigged up a completion rig to complete the well. The production casing was tested internally to 3000 psi and tested good. We then connected to the surface casing valve to try to establish a pump in rate in anticipation of doing a "top job" cement squeeze from the surface to the bottom of the surface pipe. We pressured up on the surface pipe to 500 psi and we're not able to pump into the surface casing annulus. This indicates that, even though the bond log does not show cement up into the surface pipe at 1084', that we do indeed have a seal in the surface pipe. Alta Mesa requests an amendment to the sundry notice which stated that cement would be brought back to the surface on the production string."

14. I hereby certify that the foregoing is true and correct Name (Printed/Typed) Ronda Louderman	Title Senior Regulatory Specialist
Signature <i>Ronda Louderman</i>	Date January 27, 2016

THIS SPACE FOR FEDERAL OR STATE OFFICE USE

Approved by <i>James Thur</i>	Date 3/28/2016
Title Oil & Gas Program Manager	Office Boise
