**Comment:**

I'm commenting in regard to the Application for Permit to Drill by Snake River Oil & Gas, LLC at Barlow #2-14. Please deny this application because it poses a risk to people, property values, livestock and wildlife in the area. People who live near the proposed well are concerned about living so close to oil and gas operations. The heavy trucks, noise, and possibility of leaks are a big headache that they don't want to have to deal with. They may have trouble selling their homes if buyers know there's a well nearby. I'm concerned about the possibility that the Payette River or the aquifer could be contaminated should a spill occur. Oil and gas drilling should be confined to remote areas where the benefits outweigh the risks, far from major rivers and residences.
