Re: Docket No. CC-2020-OGR-01-002 Spacing Application & Drilling Application for Barlow 2-14 Well.

Dear Sir;

I am opposed to approval of the above mentioned spacing application and to the approval of any further drilling permits in the towns of Fruitland and Payette based on the use of forced pooling regulations to obtain leases. It is my belief that forced pooling regulations are in violation of personal property rights and will be determined to be illegal by future court rulings.

My opposition to further drilling in proximity to the existing Barlow well is also based on environmental risks to the Payette river and the city of Fruitland water supply.

Thank you for considering my objection to this spacing application and to further drilling in the cities of Fruitland and Payette.

Sincerely,

Charles Otte
