Re: Active Permit Extension Request – Kauffman #1-34, Fallon #1-10

Dear Mr. Caldwell:

On February 22, 2020, the Idaho Department of Lands (Department) received your written request to extend the Active Permit status for the following two wells as prescribed in IDAPA 20.07.02.500.02:

No.	API Number	Well Name	Initial Production Test/Last Production
1.	11-075-20024	Kauffman #1-34	November, 2018
2.	11-075-20032	Fallon #1-10	March 11, 2018

The Department has reviewed your request for an extension for the above named wells, and has approved a twelve (12) month Active Permit extension for the Fallon #1-10. The Fallon #1-10 extension will expire at midnight on March 11, 2022 unless the well commences production prior to that date. A well that commences production will be considered an Active well.

Based on the last date of reported production, the Kauffman #1-34 extension would have expired at midnight on November 30, 2021. On February 22, 2021 Snake River Oil & Gas notified the Department by Sundry Notice that the Kauffman #1-34 was turned to production for approximately five days commencing February 14, 2021. Per IDAPA 20.07.02.500, this moves the last date of production to February 18, 2021 pending confirmation by the February 2021 Monthly Production / Disposition Report scheduled to be filed no later than April 14, 2021. The Kauffman #1-34 is therefore considered an Active well until February 2023 if no other production is reported in that time.

If a well has not commenced production before the expiration date, Snake River Oil & Gas LLC may request another extension under the conditions set forth in IDAPA 20.07.02.500.02. If a request is not received by the corresponding expiration date of this extension, the Department

Nate Caldwell
